

Powered by iQ

This brand is more than a new look. It's a **declaration of who we are and where we're going.**

Welcome to the Fourth Dimension of hospitality operations

Introduction: A New Era for Fourth

This brand is more than a new look. It's a bold statement about who we are — and where we're headed.

For years, Fourth was known as reliable — but not always as a leader in innovation. That changes now. With Fourth iQ at the core of our identity, we're taking hospitality into a new era — one driven by AI, powered by intelligence, and built for action.

Our rebrand brings focus. One company. One voice. One bold identity. We're no longer a patchwork of legacy names and siloed products. We're Fourth: the AI platform for hospitality operations.

This brand also reflects our ambition. We give operators the ability to anticipate, move faster, and take control of time itself. That's the Fourth Dimension. That's our edge.

But most of all, this brand reflects us. Every person at Fourth helped shape this transformation. This identity represents the energy, innovation, and unstoppable drive behind our people.

The guidelines ahead will help us bring this new identity to life — clearly, consistently, and confidently. They're more than rules about voice or design. They're how we show the world who we are — and why we matter.

Welcome to what's next.
Welcome to the Fourth Dimension.

1. Brand Essence

Our brand exists to **simplify** and **empower** the hospitality industry through intelligent, action-driven technology. Everything we create should be **clear, actionable, and human-centric.**

Essence keywords:

- Insightful
- Human
- Empowering
- Reliable

2. Brand Principles

Clarity First

- Always communicate simply and directly.
- Use plain, actionable language.
- Prioritise legibility and accessibility in all design and messaging.

Empower People

- Design and content should help managers, employees, and businesses act with confidence.
- Technology should feel like a partner, not a barrier.

Consistency Builds Trust

- Apply consistent tone, design, and colour usage across all touch points.
- Reinforce recognition with aligned visuals and message architecture.

Human + Digital Harmony

- Balance data-driven insights with a human, approachable tone.
- Icons, imagery, and illustrations should feel warm and accessible.

Brand Structure

We've simplified our brand architecture to make it easier for customers, partners, and teams to understand who we are and what we stand for.

Going forward, Fourth is our single global brand for enterprise and upper mid-market customers — across the US, and for all customers for EMEA, and APAC. HotSchedules becomes a distinct brand, focused on supporting emerging operators in the US.

This shift removes the clutter of legacy product names and sub-brands. It sharpens our story, strengthens our global identity, and puts the spotlight on the value we deliver — no matter where our customers are.

Solutions

Simpler and clearer

The iQ green now sits at the heart of Fourth. Delivering a simpler and clearer brand.

Logo styles: landscape

The core Fourth logo and icon together. This should never be split in different widths between the icon and the name. The ® symbol should always remain in the same scale and position as given.

L

Logos against different colours

This format should ONLY go against white or the soft white.

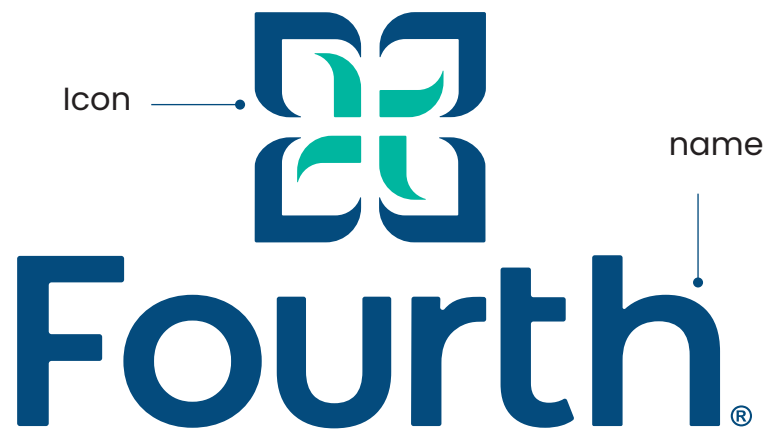

Against the deep blue the logo should always look like this. The teal showing within the icon.

Logo styles: portrait

Stacking the logo is a useful way to ensure maximum scale within a narrow shape. It should not be seen at the standard use of the logo but as something to use when needed.

The spacing and size of the icon to the name should never be changed as the dimensions of the two items are important to maintain always.

The scale and proportion should always remain the same to maintain the clarity of both items in the logo.

Logo styles: icon

The icon is a key part of the Fourth brand and can be used on its own in specific cases.

It may appear by itself as a brand reminder — but only after the full logo has been used first.

For example, in printed materials, the full logo should appear on the cover. From there, the icon can be used on following pages to reinforce the brand. The same applies to PowerPoint presentations.

The icon can also be used as a decorative element — more on that shortly.

Fourth iQ: icon

The iQ icon is a key part of the Fourth brand — a visual signal that intelligence is built into our platform and solutions.

It represents the AI capabilities within Fourth: the engine that turns data into insight, and insight into action.

The icon should always work in harmony with the Fourth logo — never as a standalone or competing mark. Its role is to support, not overshadow. It helps audiences recognize when a product, feature, or experience is powered by Fourth iQ — while keeping the focus firmly on the Fourth brand.

The teal from the iQ icon has become a defining accent across the Fourth brand — a signal of intelligence embedded within everything we do. Its presence throughout our design system reflects how iQ is woven into the DNA of every Fourth solution, visually expressing the connection between our brand and the intelligent power that drives it.

Powered by iQ

When in text referring to iQ should use the words powered by iQ – suggesting that iQ is an ingredient within a solution rather than a solution by itself.

3. Brand Colors: Primary

The approved colour palette should be used consistently across all applications.

Primary Palette

Deep blue:
#0C4A7D

Our core brand color adds depth and confidence. It nods to Fourth's heritage while bringing a fresh, modern edge. Use tints to create variety and balance across designs.

Teal Green:
#00B69F

This shade reflects iQ's signature green within our core palette. As iQ becomes central to everything Fourth does, use it to represent the energy and intelligence of AI.

Sky Blue:
#6fb4e3

Sky blue represents fresh thinking and open possibilities. Use it as an accent within the vignette to express iQ's energy and sense of movement.

Teal Green:

Deep blue:

Fourth®

3. Brand Colors: Secondary

Midnight
Navy:

#002747

Use as a black for text and bold highlights. It offers strong contrast against all colors except deep blue. Avoid using it as a background or across large areas.

Cool Grey:

#CFD1D1

Ideal for highlighting sections of text. Use midnight navy for any text on this color to keep it easy to read. Avoid using white text for better contrast.

Soft White:

#F5F5F5

A versatile background color that pairs well with the full palette. Use it to add depth or break up white space. Navy and Deep Blue work best for text on this shade.

Usage rules:

Use Sky Blue (#479E2) and Teal Green (#44BCA4) as accent/highlight colours.

Use Midnight Navy (#002747) and Deep Blue (#0C4A7D) for headers, navigation, and structure.

Use Cool Grey (#CFD1D1) and Soft White (#F5F5F5) as neutral backgrounds for clarity and space.

3. Brand Colors: Tertiary

Tertiary colors add subtle highlights to our palette. Use them lightly — they're there to support, not take centre stage.

Sunrise
Orange:
#FAA51A

Purple:
#9678B6

Hot red:
#D81632

4. Visual identity

Hierarchy:

Headings should be in Poppins semi-bold

"Neque porro quisquam est qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit..."

A sub heading – same size but semi bold + 8pt spacing

Body text should always be left-aligned and set in Poppins Regular. Because it's a sans serif font, add around 21% extra leading to keep it comfortable to read. Aim for no more than 12 words per line to maintain clarity and flow.

[See more information](#)

[See more information](#)

Accessibility:
Minimum contrast ratios must be met with brand colors.

4. Visual identity

Highlighting a quote or statement can create real impact. Use elements from the icon to frame the words in a clean, branded way that draws attention and adds character.

**Neque porro quisquam est qui
dolorem ipsum quia dolor sit
amet, consectetur, adipisci
velit.**

**Neque porro quisquam est qui
dolorem ipsum quia dolor sit
amet, consectetur, adipisci
velit.**

Icon graphic elements: Icon pattern

The icon can be used as a background graphic — either in full or cropped. Just remember: the same usage rules apply, even if the background color changes.

The pattern can be used against colors but as a tint of white.

The icons against a white background should be the tint of the deep blue.

Icon graphic elements: Icon backdrop

A light tint (11%) of white can be used against one of the prime colors to work as a background effect.

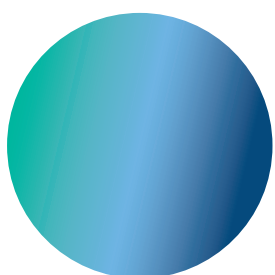

Backgrounds: Vignettes – 3 colours

The vignette stands for the dynamic movement and energy of Fourth with iQ. The vignette goes from the teal to the sky blue to the deep blue.

100% Opacity

30% opacity

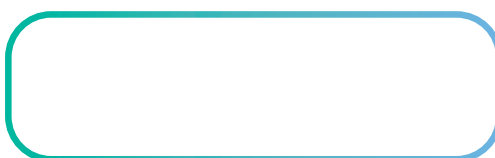

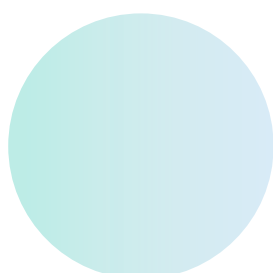

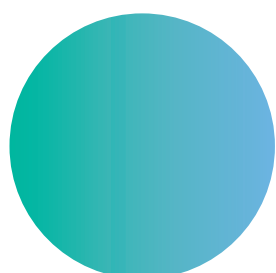

Backgrounds: Vignettes – 2 colours

As a variant, the use of the teal to sky blue is another option. Gives it a simpler look and feel.

100% Opacity

30% Opacity

Iconography: Graphic backgrounds

Using a variety of background graphics that suggest the movement of data and people helps add energy and visual interest.

They bring flexibility and depth to printed materials, presentations, and web pages — while reinforcing the story we're telling.

The graphic can be colored or monochromatic and tinted back if required.

Iconography: Graphic backgrounds

Bringing the graphic within a solid background again creates interest and a dynamic that brings to life the energy.

Full color at 30% opacity.

Iconography: Graphic backgrounds

More abstract graphical lines give the look a simpler and more of a pattern to the background.

White - tinted to 10% opacity

Photography:

Photography plays a key role in bringing our industry to life. Images should feel authentic and directly support the message being shared.

Here are the core types of photography to use across all our communications and platforms.

Software interacting
with people

Alongside Software
interfaces

People and locations
with software in use
on-site

Photography: Software interacting with people

Someone using our software — in context.
The image should reflect the right industry and show the person actively engaged with the application.

These shots need to do more than just show someone holding a device. They should visually demonstrate how the person is interacting with the software — and how it's making their job easier, faster, or better.

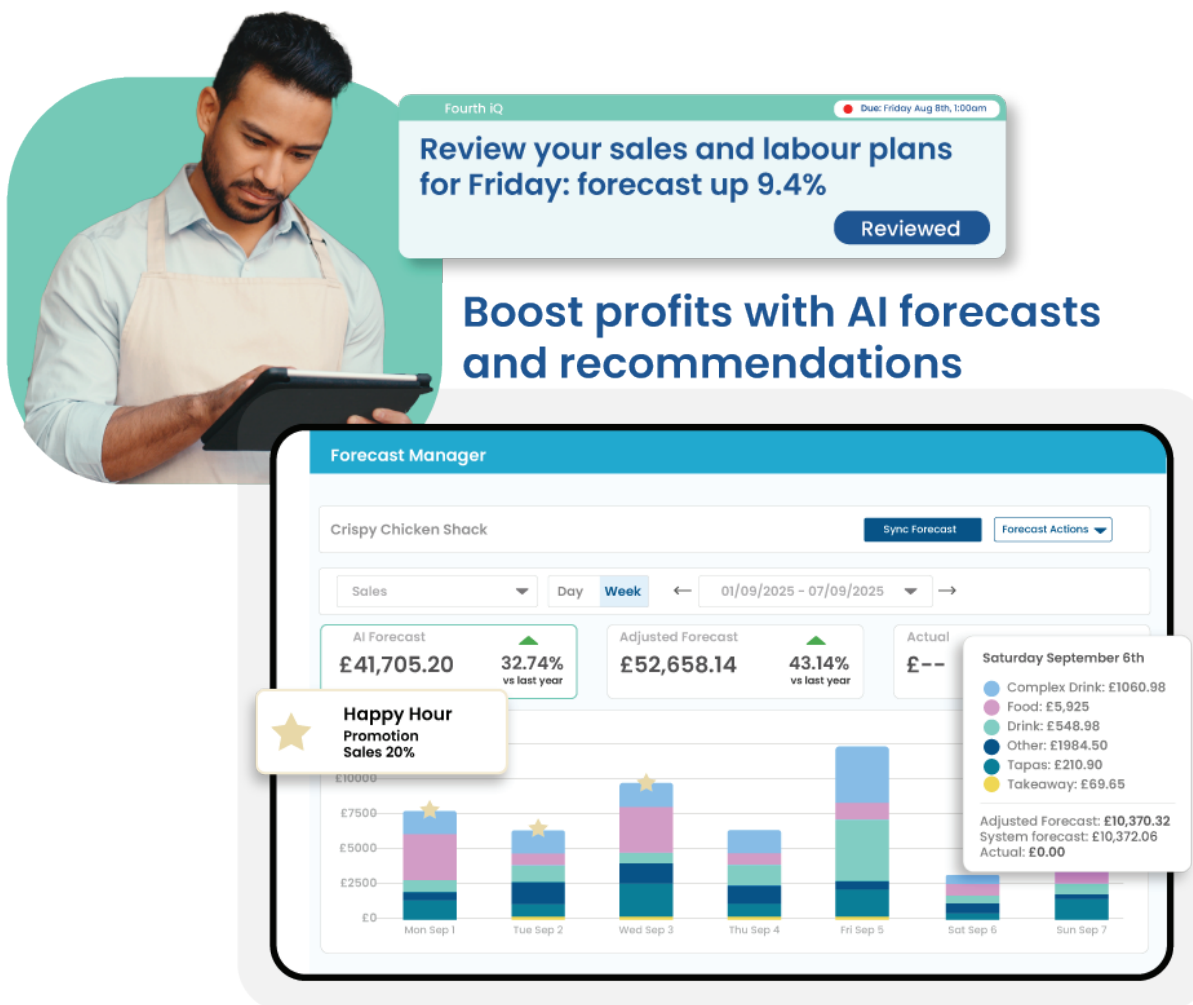

Photography: Software Interfaces

This style of photography — featuring a cut-out person over a flat color shape — is used when the software is the main focus. The person adds character, but the spotlight stays on the product.

It's important to show the person actively interacting with a device — but the background isn't needed and can distract from the message.

The shape behind the person should feel intentional and connected to the story. For example, their head might extend above the shape, while the lower half stays within it.

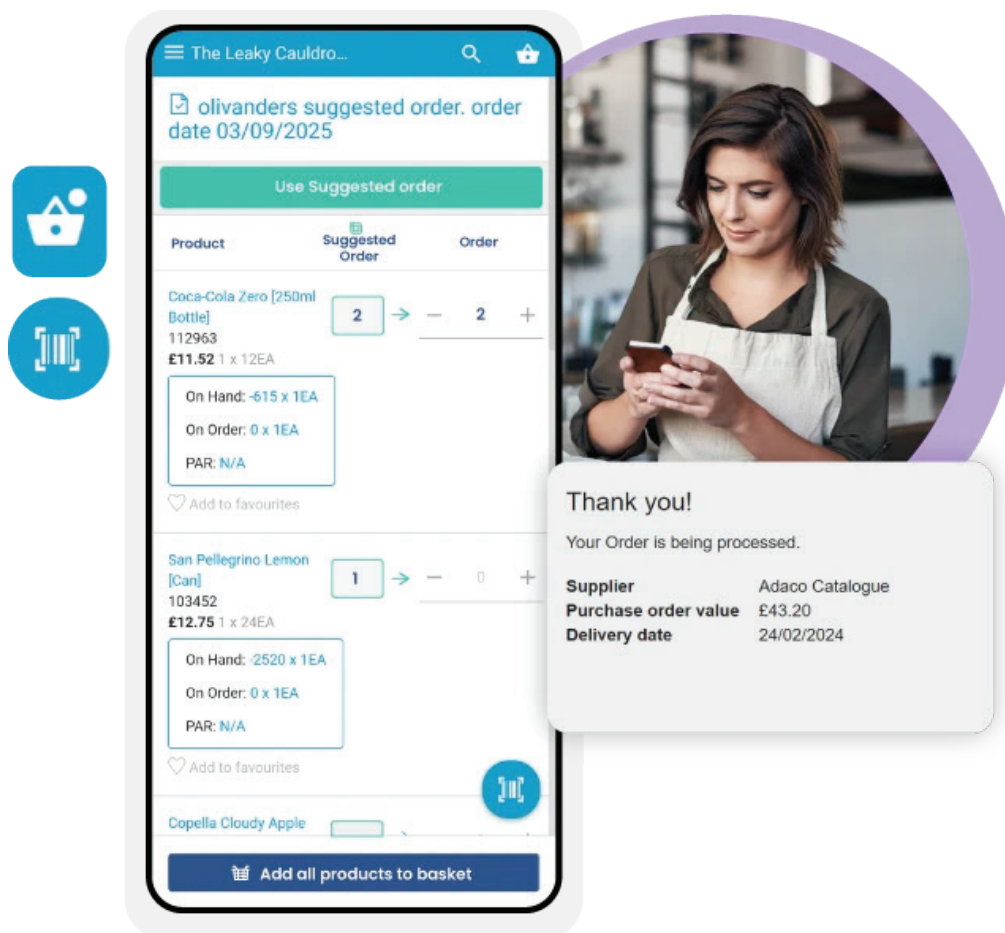

Photography: Software In-situ

This type of photography is used when the setting matters.

In the example below, placing the user in a space with stock in the background helps tell the story – giving context to the action.

The use of color around the photo helps it stand out from other elements in the design. That color can also reflect the type of product being used and act as a visual cue for product categories.

Photography: Real people

We want photos of real people who truly reflect their connection with Fourth.

We've built strong, lasting relationships — and our photography should capture that. Let those connections shine through.

Use a shallow depth of field to keep the focus on the person. Showing them in their actual work environment works especially well for customer case studies.

📈 15% Profit Margin Improvement

“We now run our business in a way that wouldn't be possible without HotSchedules. **Every manager knows exactly how much staff are needed at each service level to meet demand.**”

Dave Paul, Founder, Pluckers Wing Bar

Photography: Case studies – Brand

For case studies, always include a photo that features the customer's people or products.

Use a lozenge shape for the image and add the customer's logo for clear brand recognition.

Headlines should always start with the customer's name, followed by the improvement or outcome achieved.

Noodles & Company improved forecasting accuracy by 20% and cut labor costs by \$4M+

[Read the case study →](#)

Welcome to the Fourth Dimension

The Fourth Dimension

The Fourth Dimension represents the new era we're leading in hospitality — where intelligence powers every decision, and time is no longer a constraint. It's the space where Fourth iQ transforms data into intelligent action, helping operators anticipate what's next and control performance in real time. In our communications, the Fourth Dimension is not a slogan; it's a lens for storytelling. It should signal progress, energy, and foresight — showing how Fourth turns complexity into clarity and motion into momentum. Use it to frame moments of transformation: when AI enables smarter execution, when decisions happen faster, and when performance feels effortless. Visually and verbally, it's our shorthand for innovation and advantage — the proof that with Fourth, customers operate in a different dimension altogether.

Tone:

The Fourth Dimension should always feel energised, intelligent, and forward-moving. It reflects confidence without arrogance — the voice of a brand that's leading hospitality into its next era. In writing, use it to signal transformation and progress, not just technology. Avoid jargon; focus on clarity and human impact. When referencing it in copy, capitalise both words ("Fourth Dimension") and pair it with messages of momentum, control, and insight. Example: "Welcome to the Fourth Dimension — where your operation moves faster than time."

Design:

Visually, the Fourth Dimension is expressed through motion, fluidity, and light. Use dynamic gradients, layers, and the flowing iQ patterns to suggest movement and intelligence at work. The look should feel alive — with depth, contrast, and subtle animation where possible. The Fourth logo should anchor communications in simplicity, while the surrounding design conveys the energy of iQ — data in motion, ideas connecting, actions unfolding.

The Fourth Dimension should never feel static or corporate. It's the visual and emotional signature of a brand that turns insight into intelligent action — and performance into profit.

Iconography: Solutions

Our key products have traditionally been identified by name only. Now, we're introducing icons to give them stronger presence and build deeper product recognition.

These icons have a more casual, modern style — adding a dynamic, energetic feel that fits our brand.

iQ power: Powered by iQ tab

Use the iQ icon only when referring to Fourth's AI technology. It's a key part of our brand — now reflected in the core logo — and highlights the intelligence that powers everything we do.

Always write iQ with a lowercase 'i' and a capital 'Q'. You can bold it in text or use the teal accent color for emphasis.

When showcasing products or solutions powered by iQ, there are a few visual ways to highlight this connection.

The "Powered by iQ" tab. This features the vignette as the background, with a shadow to lift it from the page and create depth.

Powered by iQ

Powered by iQ

iQ power: Indication of iQ within a chart

Sometimes within a chart or diagram you need to indicate that something is powered by iQ. This can look rather confusing and icon heavy if the iQ icon is used multiple time within a page. The ideal way to indicate iQ then is in a couple of ways:

The use of a graduated key-line.

A simple shape next to the row

Tone of voice: guidelines

Our voice reflects who we are — a trusted, experienced partner to hospitality operators — now supercharged by intelligence.

With iQ embedded in our platform, Fourth speaks with clarity, energy, and confidence.

We make complex technology feel human, helpful, and empowering — never technical just for the sake of it.

- We sound intelligent, but not intimidating.
- Innovative, but grounded in hospitality.
- Energetic, but never over the top.

Tone keywords:

Energetic. Insightful. Human. Confident.

1. Approachability

AI can feel complex — we make it simple and natural.

We don't use jargon or technical acronyms. Every word should invite understanding, not distance it.

✓ Do say:

"iQ spots what's coming next — so you can act before it happens."

✗ Don't say:

"Our LLM-based forecasting module uses predictive analytics to optimize operations."

Tone: Friendly expert. Never corporate, never robotic.

2. Insightful

We don't just tell people what happened — we help them understand why it matters and what to do next.

Our words turn data into meaning, and meaning into action.

✓ Do say:

"By comparing sales and labor patterns, iQ recommends cutting prep by 10% tomorrow — saving \$300."

We lead with outcomes, not outputs. Our language always connects intelligence to value — whether it's time saved, more control, or higher profit.

Tone of voice: guidelines

3. Energetic

Fourth with iQ represents forward motion — optimism, speed, transformation. We write with momentum. Sentences are active, verbs are strong, and headlines move.

✓ Do say:

“Run faster, think smarter, and get time back with Fourth iQ.”

✗ Don't say:

“Fourth iQ provides enhanced automation and analytical capabilities.”

This is a brand leading the AI revolution in hospitality — our tone must feel alive, exciting, and modern.

5. Confident

We're pioneers of intelligent operations in hospitality. Our confidence comes from proof, not hype. We use clear, assertive language that inspires trust. We don't over claim; we demonstrate impact.

✓ Do say:

“Our customers cut food waste by up to 5% and reduce labour costs by 2% in the first month.”

Tone: Expert assurance, not sales bravado.

4. Human

We talk with our customers, not at them. We show empathy for the daily reality of running restaurants, hotels, and bars. Every message should reflect understanding of their world — long hours, slim margins, relentless pressure.

✓ Do say:

“We know your managers are already stretched. iQ helps them see what matters most — and act fast.”

Tone: Warm, clear, real.

6. Human

We talk with our customers, not at them. We show empathy for the real, daily challenges of running restaurants, hotels, and bars. Every message should reflect a deep understanding of their world — long hours, tight margins, constant pressure.

✓ Do say:

“We know your managers are already stretched. iQ helps them focus on what matters most — and act fast.”

Tone: Warm. Clear. Real.

Tone of voice: guidelines

Tone by Context

Context	Tone Focus	Style Example
Website & Marketing	Inspirational, energetic, forward-looking	"Welcome to the Fourth Dimension — where AI powers every decision."
Product & UX Copy	Clear, guiding, efficient	"iQ recommends scheduling two fewer servers tonight — saving time and cost."
Customer Comms	Reassuring, supportive, knowledgeable	"You don't need more dashboards. You need a co-pilot that sees what's next."
Internal & Partner Comms	Confident, unified, purposeful	"Together, we're leading hospitality into a new era of intelligent operations."

The Personality of Fourth with iQ

Fourth is the trusted, experienced partner.

iQ is the spark — the intelligence that transforms how Fourth operates. Together they form a personality that's: Experienced, Innovative, Optimistic, and Human.

Tone mantra:

"We make intelligence feel effortless — and operations feel human again."
